cheskikh Voln v Potoke Plazmy, Dvizhushcheyaya
Cherez Ionizirovanny Gas) tr. by A. Pingell. 4 Jan 61
[5]p. 8 refs. N R L Trans. no. 832.
Order from LC or SLA mi\$1.80, ph\$1.80 61-15725

Trans. of Zhurnal Eksperimental'noy i Teoreti-
cheskoy Fiziki (USSR) 1960, v. 39, no. 2(8) p. 413-415.

A dispersion equation is derived which describes the
propagation of electromagnetic waves in plasma moving
through an ionized gas. The case of low frequencies
(below the gyrofrequency of the ions), when the waves
degenerate into magnetodynamic waves, is considered
in detail. It is shown that if the velocity of the flow
exceeds the Alfvén wave velocity in the flowing and
stationary plasma system, the latter becomes unstable.
In this case one of the normal waves begins to build up.
